ROBOTIC WELDING SOLUTIONS

Welding Solutions From Experts

SOMEY in collaboration with ABB robotics and ESAB Welding solutions offers a wide variety of robotic welding applications of the highest quality on the market.

SOMEY robotic solutions are designed specifically for our customers' needs so it is possible to solve today's toughest challenges in the most demanding environments, including industries with a high mix of low-volume parts.

These solutions allow us to increase performance and productivity, without the need for more labor, all in a small space. Best of all, it is not necessary to program anything complicated, as is the case with traditional robotics. Cobots are made for welders, not programmers, with app-based software that is very easy to use and intuitive.

Efficient & Accurate Robotic Welding

- ABB 6-axis collaborative robot with either 950mm, 1270mm or 1520mm reach from base
- Advanced ESAB 500A Pulsed MIG power source with water-cooled torch
- U82 operator pendant control offers quick and easy access to all relevant control parameters, full pack of synergic lines

ROBOTIC WELDING SOLUTIONS

Welding Made Easy at the Touch of a Button.

Solve today's toughest welding challenges with a Cobot GoFa welding cell from **SOMEY**. With no-code programming and an intuitive user-interface, any welder can use GoFa. Upgrade to better quality welding, reduced deployment times and automate the dull, dirty and dangerous tasks.

Built to Work Together with You.

Anyone can use GoFa. With user-friendly collaborative programming using ArcWare for managing and fast set-up for your weld programs and Wizard block for avoiding traditional programming methods makes robotic welding easier than ever before. Empower your welders to automate simple weld jobs, reducing weld defects and increasing productivity.

The Easy Way to Achieve High Quality Results.

GoFa offers unmatched position accuracy, superior path accuracy and reduced scrap compared to manual welding. Industrial-grade welding software ensures consistent, high-quality welds every time, while the autogenerated program feature of the Easy Teach device saves 70% of programming time.

Ultimate Flexibility for Multiple Applications.

Need an easily reprogrammable solution for high-mix, low-volume welding? GoFa is the answer. With scalable programming suitable for operators of all programming skill levels and a lightweight portable design, switching to robotic welding has never been easier.

Built to work together with you.
